

Medical Conditions (Prep School) Policy

Ref: **LP-PP-021**

Version: **4.5**

Date: *23rd September 2019*

Document Owner: **Jacky Shackel (Head of Prep School)**

Description: This policy outlines the Prep School's approach to managing pupils' medical conditions.

OUR SCHOOL AIMS

- ❖ *To foster intellectual curiosity and a love of learning.*
- ❖ *To achieve high academic standards in a supportive but disciplined atmosphere.*
- ❖ *To equip pupils with the skills and knowledge to meet the challenges of our rapidly changing world.*
- ❖ *To instill an enthusiasm in interests and opportunities beyond the classroom.*
- ❖ *To support pupils' development of a sense of justice and an awareness of their rights and responsibilities as global citizens.*

1.0 POLICY STATEMENT AND PRINCIPLES

- 1.1 The School (incorporating Lingfield College, Lingfield College Prep, Lingfield College Nursery, Lingfield College Sixth Form) is an inclusive community that aims to support and welcome pupils with medical conditions. This School understands its responsibility to make the School welcoming, inclusive and supporting to all pupils with medical conditions and provide them the same opportunities as others at the School.
- 1.2 We will help to ensure they can:
 - be healthy
 - stay safe
 - enjoy and achieve
 - make a positive contribution
 - achieve economic well-being.
- 1.3 The School ensures that all staff understand their duty of care to children and young people in the event of an emergency.
- 1.4 Staff receive on-going training and are regularly updated on the impact that medical conditions can have on pupils. The training agenda is based on a review of current healthcare plans.
- 1.5 The conditions affecting some of our pupils are displayed on a medical noticeboard in the staffroom and in the Foundation Stage Kitchen.
- 1.6 All staff feel as confident as possible in knowing what to do in an emergency.

- 1.7 This School understands that certain medical conditions are serious and can be potentially life threatening, particularly if ill-managed or misunderstood.
- 1.8 This School understands the importance of medication being taken as prescribed.
- 1.9 All staff understand the common medical conditions that affect children at this School.
- 1.10 The Prep School has consulted on the development of this medical condition policy with a wide range of key stakeholders within both the school and health settings.
- 1.11 The Medical Conditions Policy is supported by a clear communication plan for staff, parents and pupils to ensure its full implementation. It is available on the School website for parents to access, and is being used as part of staff training.
- 1.12 The policy is revised annually by the Head of Prep School/DSL and the School Office Manager. The policy and supporting documents are based on Department of Education statutory guidance (Sept 2014) Supporting pupils at School with medical conditions and the recommended templates 'Templates supporting pupils with medical conditions'.
- 1.13 The Prep School ensures that the whole school environment is inclusive and favourable to pupils with medical conditions. This includes the physical environment, as well as social, emotional, sporting and educational activities:

2.0 THE ENVIRONMENT, SOCIAL INTERACTIONS AND PHYSICAL ACTIVITY

The Prep School is committed to support pupils with medical conditions through:

- Providing a physical environment that is accessible to all.
- Ensuring their needs are considered to enable all to be as fully involved as possible in social activities during breaks, before school and after school.
- Ensuring full access is available to extended school activities such as school discos, Breakfast Club, school productions, after-school clubs, school trips and residential visits.
- Understanding the importance of all pupils taking part in sports, games and activities and making appropriate adjustments to facilitate this where possible.
- Ensuring that pupils are not forced to take part in an activity if they feel unwell and staff are aware of pupils in their care who have been advised to avoid or to take special precautions with particular activities.
- Being aware of potential triggers for pupils' medical conditions when exercising and how to minimize these triggers.

3.0 EDUCATION AND LEARNING

To ensure that pupils with medical conditions can participate fully in all aspects of the curriculum, the Prep School ensures that:

- Appropriate adjustments and extra support are provided.
- Teachers understand that if a pupil misses time at school, they have limited concentration or they are frequently tired, this may be due to their medical condition.
- Teachers are aware of the potential for pupils with medical conditions to need learning support. Those pupils finding it difficult to keep up with their studies are referred to the SENDCO, who consults the pupil and, parents to ensure the effect of the pupil's condition on their schoolwork is properly considered.

4.0 EDUCATIONAL VISITS

- 4.1 Risk assessments are carried out by the Prep School prior to any out-of-school visit and medical conditions are considered during this process. Factors considered include: how all pupils will be able to access the activities proposed, how routine and emergency medication will be stored and administered, and where help can be obtained in an emergency.
- 4.2 The Prep School understands that there may be additional medication, equipment or other factors to consider when planning residential visits. The Prep School considers additional medication and facilities that are normally available at school.

5.0 COMMON TRIGGERS AND PREVENTION

All staff are committed to reducing the likelihood of medical emergencies. This is carried out by identifying and reducing triggers both at the Prep School and on out-of-school visits by:

- Keeping a list of the common triggers for the general medical conditions
- Names of pupils affected are kept in prominent places such as the staff room and photos are passed to the Catering staff, along with information of those with special diets.
- Pupils in the EYFS have clear labels on the table in front of them stating what they are not allowed to eat.
- Reviewing medical emergencies and incidents to see how they could have been avoided.

6.0 ROLES AND RESPONSIBILITIES

6.1 Parents and guardians should

- make sure that all medical conditions that a child has should be detailed on their application form and all subsequent medical forms, including trip consent forms (links to relevant forms are available in the Appendices)
- give details of the symptoms, practicalities, warning signs and wider implications of their child's condition as well as advice on what action they expect the Prep School to take.
- inform the Prep School in writing of daily medical needs and provide detailed information for day trips/residential visits
- notify the Prep School of any changes to their child's condition
- provide up-to-date, labelled medication and complete a Parental Consent form to give permission for the Prep School to administer the medicines if required, and remove any out of date medication.

6.2 Pupils should

- ensure they inform responsible adults on how their condition affects them
- seek help from a member of staff or the School Office when they need it

6.3 The Senior Management Team should

- ensure the Prep School is inclusive and welcoming

- provide indemnity to staff who volunteer to administer medication (Headmaster)
- Ensure health and safety measures exist for staff and pupils on the advice of the Health & Safety Officer
- Provide training for staff where necessary.
- Risk assessments for events and trips are inclusive of pupils with medical conditions on the advice of the Health & Safety Officer
- Medical policies (First Aid, Medical Conditions, Mental Health) are kept up to date (Head of Prep School)
- report on medical policy success and improvement (Head of Prep School) when required.
- that Medical Policy is in keeping with local and national guidance and frameworks (Head of Prep School)
- liaise between interested parties, ensure policy is implemented and kept up to date, ensure training for staff (Head of Prep School)
- help provide regular training to Prep School staff on common medical conditions, such as asthma, nut allergies etc.

6.4 Office Staff should

- help update the Prep School's medical policies,
- provide information about additional training
- give immediate help to casualties in the Prep school
- ensure ambulance or other professional help is called when necessary
- contact parents about any medical concerns
- update medical records regularly
- update medical conditions booklet as necessary
- check that all medication is correctly stored and labelled and is only accessible to those for whom it is prescribed.
- check all medication stored at the Prep School each term. Ensure that any expired medication is returned to the pupil's parents and the details documented.
- Check that all medication brought into the School Office is named, in its original packaging and indicates the dosage and instructions for administration.
- Maintain medical noticeboard in the staff room giving details of specific pupils with serious medical conditions.

6.5 SENDCO/Head of Prep School should

- help update Prep School's Medical Conditions Policy
- know which pupils have SEN due to their medical condition
- ensure teachers make arrangements if pupil needs special adjustments
- ensure pupils with medical conditions are not excluded unnecessarily from activities.

6.6 Teachers and other Prep School staff should

- be aware of triggers and symptoms of conditions and how to act in an emergency,

- know which pupils have a medical condition,
- allow pupils immediate access to emergency medication,
- communicate with parents if child unwell,
- ensure pupils have their medication when out of the classroom (sports staff , supervising staff on trips)
- be aware if pupils with medical conditions suffer bullying or need extra social support
- understand common medical conditions and impact on pupils
- ensure all pupils with medical conditions are not excluded unnecessarily from activities
- ensure pupils with medical conditions have adequate medication and sustenance during exercise
- be aware that medical conditions can affect school work,
- liaise with parents if child's learning is suffering due to medical condition
- use opportunities (relevant topics in lessons, assemblies etc) to raise awareness of particular medical conditions

7.0 MONITORING OF INDIVIDUAL HEALTHCARE PLANS

7.1 Where appropriate we use Individual Healthcare Plans (IHCP) to record important details about individual children's medical needs at the Prep School, their triggers, signs, symptoms, medication and other treatments. Further documentation can be attached to the Individual Healthcare Plan if required.

- IHCP are written up for pupils with a serious medical condition.
- If a pupil has a short-term medical condition that requires medication during school hours, a medication form plus explanation is completed by the pupil's parents. Parents are expected to grant written permission if they wish a member of the school staff to administer medication: they should complete the Parental Agreement for the Administering of Medicines Form to request this.

7.2 Visually, this is represented in the table on the following page:

8.0 RECORD KEEPING: SCHOOL HEALTH CARE REGISTER

8.1 Parents are asked to fill out an annual **IHCP** and are expected to notify the Prep School of any subsequent changes in a student's health.

8.2 Details of each student's medical needs are logged and updated by members of the School Office in the health section of iSAMS for staff to access

8.3 Extracts from iSAMS are collated & updated on a termly basis into a booklet detailing particular pupils' medical conditions which is saved on the JSC drive and staff can use when necessary e.g. taking a school trip.

8.4 Certain basic pieces of information about immediate health concerns are recorded on the weekly confidential Pastoral Bulletin, which is emailed to all teaching staff.

9.0 STORAGE OF AND ACCESS TO INDIVIDUAL HEALTHCARE PLANS

- 9.1 Individual forms (together with relevant medical documentation on pupils) are stored in the office next to the Medical Room in lockable filing cabinets.
- 9.2 Access to the confidential medical records is restricted
- 9.3 New staff are made aware of specific medical situations, shown how to access particular information and expected to check iSAMS for medical conditions and SEND issues before meeting their classes
- 9.4 Staff are expected to maintain their professionalism and ensure that they do not break medical confidentiality; details of this are in the Staff Code of Conduct document.
- 9.5 Medical details are given to emergency services with permission where relevant.

10.0 USE OF IHCPs

Individual Healthcare Plans are used by the Prep School to:

- Inform the appropriate staff and cover teachers about the individual needs of a pupil with a medical condition in their care.
- Remind pupils with medical conditions to take their medication when they need to and, if appropriate, as in the case of diabetes, remind them to keep their emergency medication with them at all times.
- Identify common or important individual triggers for pupils with medical conditions at the Prep School that bring on symptoms and can cause emergencies. The Prep School uses this information to help reduce the impact of common triggers.
- Ensure that all medication stored at the Prep School is within the expiry date.
- Remind parents of pupils with medical conditions to ensure that any medication kept at the Prep School for their child is within its expiry dates. This includes spare medication.

11.0 ADMINISTRATION OF MEDICATION

- 11.1 The Prep School understands the importance of taking the medication as prescribed.
- 11.2 All staff understand that there is no legal or contractual duty for any member of staff to administer medication or supervise a pupil taking medication unless they have been specifically contracted to do so. Where specific training is not required, any member of staff may administer prescribed and non-prescribed medicines to pupils under the age of 16 with parental consent, but it is recommended that medication is taken in the Prep School Medical Room under the supervision of the Prep School Office Staff or other trained First Aiders. Our Governing Body is responsible for ensuring full insurance and indemnity to staff who administer medicines. Our insurance policy includes liability cover.
- 11.3 Administration of medication which is defined as a controlled drug (even if the pupil can administer themselves) should be done under the supervision of a member of staff, and ideally in the Medical Room

MONITORING OF INDIVIDUAL HEALTHCARE PLAN:

Parent or healthcare professional informs the Prep school that

- the child has been newly diagnosed
- is due to attend a new school
- is due to return to the Prep school after a long-term absence,
- needs have changed

Head of Prep School/ SENDCO/Class Teacher /coordinator a meeting to discuss the child's medical support needs, and identifies member of Prep school staff who will provide support to the pupil

Meeting to discuss and agree on need for IHCP to include key school staff, child, parent, relevant healthcare professional and other medical/health clinician as appropriate (or to consider written evidence by them)

Develop IHCP in partnership – agree who leads on writing it. Input from healthcare professional must be provided.

Prep School staff training needs are identified and managed

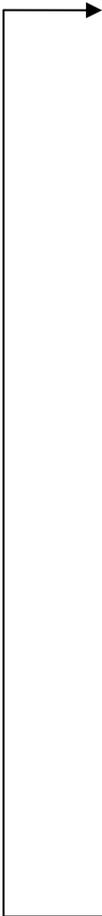

Healthcare professional commissions/delivers training and staff signed off as competent – review date agreed

IHCP Implemented and circulated to all relevant staff

IHCP reviewed annually or when condition changes. Parent or healthcare professional to initiate

12.0 CALPOL

- 12.1 In certain circumstances the Prep School will administer Calpol to a child when they have a very high temperature and the parent/carer cannot get to the school very quickly.
- 12.2 Parents are asked to give their consent to allow Prep School staff to administer Calpol.
- 12.3 Records of administration are kept, and parents will be kept informed.

13.0 STORAGE OF MEDICATION

13.1 Prescribed medicines should only be taken to the Prep School when essential, namely when it would be detrimental to a child's health if the medicine were not administered during the school day. Medication must be brought into the Prep School in the original container as dispensed by a pharmacist, and include instructions for administration and dosage.

13.2 Safe storage – Emergency Medication (Auto Injectors)

- Emergency medication is readily available to pupils who require it at all times during the school day. If the emergency medication is a controlled drug and needs to be locked up, the keys are readily available from the School Office.
- All Auto Injectors (including Pupil's own spare) are kept in the lockable cabinet which is in the School Medical Room. The school holds a generic spare auto injector which is kept in the lockable cabinet too.
- Teachers are reminded to collect and take emergency medication with them when going with children on fixtures or school trips.
- In the Prep School, individual medication is stored in a plastic wallet, clearly labelled with the child's name and date of birth.

13.3 Safe storage – non emergency medication

- All non-emergency medication is kept in a lockable cupboard in the School Medical Room
- Pupils with medical conditions know where their medication is stored and how to access it.
- Staff ensure that medication is only accessible for the child for whom it is prescribed.

13.4 Refrigeration - in the event that medication needs to be refrigerated, it must be clearly labelled. Refrigerators are used for the storage of medication where appropriate. This is in a secure area of the Medical Room, inaccessible to unsupervised pupils.

13.5 Disposal of Medication & Sharp Objects - all out of date medication and Auto Injectors are returned to parents for disposal.

14.0 RECORD KEEPING

- 14.1 A medication register is kept in the Prep School Medical Room detailing the medication administered to all pupils.
- 14.2 Record is kept of pupils on long-term medication, as well as the date their medication was supplied to the Prep School and its expiry date.
- 14.3 A log is made of any emergency medication administered including the time and date and by whom.

- 14.4 In the case of an emergency, an incident report form is completed and submitted to the Health and Safety officer.

15.0 IN AN EMERGENCY

- 15.1 Relevant staff understand what to do in an emergency for the most common serious medical conditions at the Prep School. A number of members of staff are trained in First Aid, and their qualifications are updated regularly when required.
- 15.2 In an emergency situation, Prep School staff are required under common law duty of care to act like any reasonably prudent parent/carer. **This may include administering medication.**
- 15.3 The Prep School uses IHCP to inform the appropriate staff (including cover teachers and support staff) of pupils with complex health needs in their care who may need emergency help.
- 15.4 Cover staff are given temporary access to iSAMS on entry to the Prep School, and advised to check pupils' medical information as indicated by the red flag on the register. There are Teaching Assistants in all year groups who have a knowledge of the pupils and can also share this.
- 15.5 Office staff use iSAMS to inform emergency ambulance staff or hospital professionals and to make them aware of the contents of a pupil's Individual healthcare plan in an emergency.
- 15.6 The Information available in IHCPs is also used to support transitional arrangements to another school and is sent through promptly to the new institution.
- 15.7 If a pupil needs to be taken to hospital, a member of staff will always accompany them and will stay with them until a parent arrives wherever possible. The Prep School will try to ensure that the staff member will be one the pupil knows. The staff member concerned should inform a member of the Prep School's senior management team before leaving.
- 15.8 All pupils with medical conditions should have easy access to their emergency medication. Items such as inhalers and Auto Injectors are held by the pupil who must take the responsibility to have it to hand at all times.
- 15.9 Pupils are encouraged to administer their own emergency medication (e.g. Auto Injector) where possible and should carry it with them at all times unless it is a controlled drug as defined in the Misuse of Drugs Act 1971. During off-site or residential visits medication is kept with a specific member of staff.
- 15.10 Pupils are encouraged to keep spare supplies of emergency medication in the Prep School Medical room.
- 15.11 For off-site activities, such as visits, sporting fixtures, holidays and other school activities outside normal timetable hours, a risk assessment is undertaken to ensure pupils needing medication still have access and a staff member is named as the responsible lead. The risk assessment also helps to identify any reasonable adjustments that need to be made.

16.0 UNACCEPTABLE PRACTICE

Our staff recognise that the following points constitute poor practice, and details of several of the issues listed below are also in the **Staff Code of Conduct**:

- Prevent children from easily accessing their inhalers and medication and administering their medication when and where necessary.

- Assume that every child with the same condition requires the same treatment.
- Ignore the views of the child or their parents; or ignore medical evidence or opinion (although this may be challenged).
- Send children with medical conditions home frequently or prevent them from staying for normal Prep School activities, including lunch, unless this is specified in their IHCPs.
- If the child becomes ill, send them to the School Office or Medical Room unaccompanied or with someone unsuitable.
- Penalise children for their attendance record if their absences are related to their medical condition, e.g. hospital appointments (where known)
- Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively.

17.0 COMPLAINTS

17.1 If parents or pupils wish to complain how pupils with medical are supported, it should so by contacting the Headmaster, in the first instance. The matter will then be dealt with directly or referred to the Governing Body.

17.2 The school evaluates its Medical Conditions Policy each year and makes appropriate revisions.

APPENDICES

A – IHCP

B – Parental Agreement for Prep Staff to Administer Medicine Form

C – Anaphylaxis policy

D – Asthma policy

E – Diabetes policy

F – Epilepsy policy

G – Nut Usage policy

OTHER POLICIES

Please also refer to following policies:

- First Aid
- Child Protection
- Health and Safety

Last reviewed December 2018

Next review due December 2019

HEALTH QUESTIONNAIRE

Has your child ever suffered any of the following conditions (please tick all that apply):

- Diabetes
- Chest Pains
- Family History of Heart Disease
- Muscular/Joint problems
- Asthma or other respiratory problems
- Migraine/Dizziness
- Recent Surgeries
- Any sustained injuries/illnesses
- Epilepsy
- Difficulty with any form of physical exercise
- Currently taking any medication
- Severe allergic reaction
- Other

If you ticked any of the above, please give details of the condition below:

Describe medical needs and give details of child's symptoms, triggers, signs, treatments, facilities, equipment or devices, environmental issues etc. Please add extra information on a separate sheet if necessary

Name of medication, dose, method of administration, when to be taken, side effects, contra-
indications, administered by/self-administered with/without supervision

Daily care requirements

Specific support for the pupil's educational, social and emotional needs (please outline)

Describe what constitutes an emergency, and the action to take if this occurs

Parent/Guardian signature----- Date-----

APPENDIX B

PARENTAL AGREEMENT FOR LINGFIELD COLLEGE PREP STAFF TO ADMINISTER MEDICINE

Medication cannot be administered without the completion of this form.

Name of child			
Date of birth			
Class			
Medical condition or illness			
Medicine (NB: Medicines must be in the original container as dispensed by the pharmacy) Where possible the need for medicines to be administered at school should be avoided. Parents are therefore requested to try and arrange the timings of doses accordingly. It is not the Prep School's responsibility to remember to administer medication.			
Name/type of medicine (as described on the container)			
Doctor Prescribed	Yes / No <i>please circle</i>		
Expiry date			
Dosage/method/timings			
Completion Date (where relevant)			
Self-administration	Yes / No <i>please circle</i>		
Medication should be refrigerated	Yes / No <i>please circle</i>		
Special precautions/side effects or other instructions the school should be aware of			
Procedures to take in an emergency			
Contact Details & Consent			
Name			
Daytime telephone no.			
Relationship to child			
I understand that I must deliver the medicine personally to the Prep School Office. The above information is, to the best of my knowledge, accurate at the time of writing and I give consent to Prep School staff administering medicine in accordance with the Prep School policy. I will inform the Prep School immediately, in writing, if there is any change in dosage or frequency of the medication or if the medicine is stopped (long term medication).			
Signature _____		Date _____	

APPENDIX C

MEDICAL CONDITIONS: ANAPHYLAXIS

At the Prep School we aim to support children with allergies and try to ensure that they are not disadvantaged in any way whilst at our School. To achieve this we ask for the support and cooperation of the parents.

Definition of Anaphylaxis

It is a sudden, severe allergic reaction, when the body reacts to a foreign substance, which triggers an exaggerated response from the immune system.

The reaction can be mild or severe with a slow or fast onset.

Foreign substances can include foods (e.g. nuts) animal venom (e.g. wasp sting) objects (e.g. latex), drugs (e.g. penicillin)

Signs & Symptoms of Anaphylaxis

- Headache
- Nausea and/or vomiting
- Abdominal cramps
- Itching skin
- Rash and/or hives (weals or blotches) on body
- Flushing of skin
- Pale/grey colour
- Wheezing
- Difficulty in breathing
- Cyanosis (blue around the lips, finger nails)
- Stridor (a high pitched sound resulting from turbulent air flow in the upper airway. It may be inspiratory, expiratory or present on both inspiration and expiration. It can be indicative of serious airway obstruction)
- Collapse, unconsciousness, death

The child can have any of these signs and symptoms, in any order. There is no set pattern for any child. Just because the child has experienced certain signs and symptoms before, does not mean that he/she will experience the same signs and symptoms in the future.

Points to consider

- Photographs of pupils with allergies are circulated to Catering and put up in the Staff Room as well as kept on intranet in the Prep School (Prep Staff Common/Medical).
- Pupils at risk of anaphylaxis wear risk bands when at school during the day.
- Cooking (awareness of ingredients when planning session).

- Science (awareness of substances being used for experiments)
- Shop play area (awareness of empty packets that are being used)
- Teacher treats

Medication in the Prep School

- We require medication details to be kept in the office and be regularly updated by parents if the medication changes. Parents must complete a medical consent form. It is essential to have up to date contact numbers which can be used in an emergency.
- We expect that all children needing adrenaline injectors will have two on school premises, one to be kept in the School Office and one to be kept in the classroom. These must be clearly labelled with the child's full name and date of birth.
- Each adrenaline injector is for the personal use of the child and will not be available to anyone else. It is the responsibility of the parents to ensure that these are within the expiry date.
- Adrenaline injectors will be accessible at all times.
- All staff on off-site activities (outings, sporting events, local walks etc.) should have a list of pupils with allergies and the adrenaline injectors should be taken. This list is available on iSAMS. At the start of each off-site activity, pupils must collect their medication from the School Office. Staff should check that the children have their medication before departing. Staff are regularly offered training in using an adrenaline injectors.

EMERGENCY PROCEDURE FOR ALLERGIC REACTION

IN THE EVENT OF A SEVERE ALLERGIC REACTION, STAFF WILL FOLLOW THIS PROCEDURE.

STAFF MEMBER TO COLLECT MEDS FROM OFFICE AND TAKE TO INCIDENT.

- Contact Ambulance Service.
- Administer Adrenaline and note time (staff member to stay with child).
- Inform parents or named contacts.
- One adult to inform Headmaster of action taken.
- If child shows no sign of recovery administer 2nd injection (if available) and note time. (put empty injectors back into emergency box).
- Hand over child's care to ambulance team/parents on their arrival including used medicines.
- Record all medication and times given.
- Complete documentation.

APPENDIX D

MEDICAL CONDITIONS: ASTHMA

At the Prep School we aim to support children who have asthma and try to ensure that they are not disadvantaged in any way whilst at our School. To achieve this we ask for the support and cooperation of the parents.

1. We require medication details to be kept in the School Office and be regularly updated by parents if the medication dosage or frequency is changed. Parents must complete a medical consent form. It is essential that we have up to date contact numbers which can be used in an emergency.
2. Where possible we expect that all children needing reliever inhalers will have at least one on school premises. This is kept in the School Office. The school also has a general spare which is kept in the School Office. All inhalers must be clearly labelled with the child's full name and date of birth. If parents will not provide an inhaler they must sign a disclaimer. The Nursery will keep inhalers in a cupboard in the kitchen.
3. Each inhaler held in the School Office is for the personal use of the child and will not be available to anyone else. It is the responsibility of the parents to make sure that the dosage is correct, that there is sufficient medication in the inhaler and that they are not being used beyond their expiry date. Parents are responsible for keeping the Prep School informed of any problems, concerns or changes to their child's reliever medication. Inhalers which use powder capsules; should be taken home periodically and washed. Each inhaler is to be taken home at the end of the summer term.

Inhalers will be accessible at all times. In the Prep School, they will be kept office and in the Nursery they will be kept in a cupboard in the kitchen

4. Children who have exercise-induced asthma will have the opportunity to use their inhaler before they start exercise. If a child becomes wheezy during exercise, they will be able to take their reliever and rest until they feel better. Our aim is to encourage the pupils' independence, self-confidence and responsibility in dealing with their condition. If they attend the office to use the inhaler, then it is recorded. Inside each plastic wallet for a child who has asthma there is a little slip on which any medication administered when off-site should be recorded.
5. All teachers on off-site activities should have a list of the asthmatic pupils in their care. This information is also available on iSAMS and is continually updated. The respective pupils take their own reliever medication (inhalers) with them when off site.
6. Infants and Nursery

The teacher/group leader looks after the reliever medication and the asthmatic pupils are told who to go to if they should become "wheezy." In the event of a pupil needing to use their inhaler, the teacher/group leader will record the dose taken and time. Parents are informed upon collection.

Staff have regular First Aid Training.

APPENDIX E

MEDICAL CONDITIONS: DIABETES

INTRODUCTION

At the Prep School we recognise the importance of supporting children with diabetes. Our aim is to create an environment which is conducive to supporting those pupils affected in managing their condition safely without drawing unwelcome attention. The diabetes policy forms part of our medical conditions policy.

OBJECTIVE

This policy has been created to offer a clear outline as to how we support pupils affected by diabetes at the Prep School and what happens in the event of an emergency. We want to ensure that all pupils are fully included in all aspects of school life.

Definition of diabetes

Diabetes is a long-term medical condition where the amount of glucose in the blood is too high because the body cannot use it properly. When the hormone insulin is not present in the body, or does not function properly, glucose builds up in the body.

There are two main types of diabetes: Type 1 and Type 2. Type 1 diabetes develops if the body is unable to produce any insulin and most pupils with diabetes will have Type 1. Type 2 does not typically appear before the age of 40.

GUIDELINES FOR IMPLEMENTATION

Medication

Pupils will normally carry an insulin pen to help manage their condition.

Spare medication must be refrigerated and can be used for up to a month after removing from the fridge, following which it must be discarded.

In the Prep School, a health plan will be put in place and depending on age and maturity, different procedures may be followed. For example, in the nursery, the parent will visit the Prep School to check their child's blood and give an injection. Staff are trained, and when both parents and staff are comfortable, staff will administer medication. As the child progresses through the Prep School, additional staff will be trained until the pupil is responsible/mature enough to self-administer medication. Medication will be kept in an appropriate location within easy access.

Meals and snacks

Pupils with Type 1 diabetes need to eat at regular intervals. A missed meal or snack could lead to hypoglycaemia, which is the body's reaction to blood glucose level becoming too low.

In the Prep School, parents are asked to provide a snack and staff are trained to ensure that the child eats at the correct time. Greater responsibility is encouraged as the child matures.

Exercise and physical activity

Pupils affected by diabetes should be able to enjoy normal physical activities and it will not prevent them from being chosen for and encouraged to join sporting teams. It is recognised, however that pupils with diabetes need to prepare more carefully for all forms of physical activity. The pupil will (with assistance from staff)

- Be given time to check their glucose levels.
- If subsequently necessary, be given time to perform a test for ketones (the by-product of the body burning fat for energy) without fuss or drawing unnecessary attention.
- Be given time for their insulin to take effect and blood glucose levels come down before taking part in physical activity.
- Be responsible for ensuring that they have eaten enough before starting an activity.
- Be given access to food or drink as necessary during or after strenuous or prolonged exercise.

If a pupil is not confident in participating in physical activity, the Prep School will discuss the situation with the pupil's parents to ascertain if such an activity is suitable.

Creating awareness amongst peers

The Prep School aims to establish and maintain an environment where children are provided with forums to openly discuss situations that affect their fellow pupils thus promoting understanding and minimising speculation.

In the Prep School, this is carried out during PSHECE lessons and in assemblies. In 2013-14 the Prep School charity was Diabetes UK and the children were well informed that year. In 2015-2016 the Prep School charity was Young Epilepsy. In 2016-2017 the school supported the Orpheus Centre. In 2017-18 the charity was Alzheimers UK and in 2018-19 it is Kent, Surrey and Sussex air Ambulance.

Staff training and communication of the policy

The policy is available on our website.

In the Prep School, booklets and information about diabetes are displayed in the staff room and on the intranet (Prep Staff Common/Health and Safety/Medical). This includes information on how to deal with an emergency and the common triggers.

Staff are kept up to date with details of pupils affected by diabetes in staff meetings and displays in the staff room.

In case of an emergency

Staff are made aware of symptoms to watch out for relating to pupils with diabetes. There are three main complications that can occur:

- Hypoglycaemia
- Hyperglycaemia – which, if left untreated will develop to
- Ketoacidosis

If Ketoacidosis is suspected, the member of staff present will immediately contact the emergency services and the child's parents, via the School Office.

If Ketoacidosis is not suspected, but there is a concern about the child, the member of staff will immediately ensure that the pupil is taken to the School Office where the following procedure will be followed:

- The child's parents will be contacted and if applicable, may request extra insulin be given.

- If applicable, a sugary, quick-acting carbohydrate or a drink such as fruit juice will be given to the child.
- The pupil will remain in the School Office or sick room to be monitored.
- If there is any doubt, at any time, staff will contact the emergency services and parents.

Roles, responsibilities and review

The Headmaster, in conjunction with the Pastoral Head of Prep School is responsible for the implementation and monitoring of the policy. All staff are responsible for ensuring the policy and procedures are followed. Parents are responsible for keeping the school informed of medical conditions that affect their child and for covering medication where applicable.

In the Prep School, pupils are guided towards responsibility as they mature, however before that time they are allocated a member of staff who accompanies them and tests them at specific times and then communicates with parents.

- Disability policy

APPENDIX F

MEDICAL CONDITIONS: EPILEPSY

INTRODUCTION

At the Prep School we recognise the importance of supporting children with medical conditions such as epilepsy. The Prep School is committed to creating an environment which is conducive to supporting those pupils affected, in managing their condition safely. The epilepsy policy forms part of our Medical Conditions policy.

OBJECTIVE

This policy has been created to offer a clear outline as to how we support pupils affected by epilepsy at the Prep School and what happens in the event of an emergency. Our aim is to ensure that all pupils are fully included in all aspects of daily school life.

Definition of epilepsy

Epilepsy is a tendency to have seizures (sometimes called fits). A seizure is caused by a sudden burst of intense electrical activity in the brain. This causes temporary disruption to the way that messages are passed between brain cells, so the brain's messages briefly pause or become mixed up. There are many different kinds of epilepsy and about 40 different seizure types.

GUIDELINES FOR IMPLEMENTATION

Medication

The majority of people with epilepsy take regular medication with the aim of controlling their seizures. Generally medication can be taken outside of school hours; however there may be some side effects. Staff are made aware of possible side effects such as drowsiness and poor memory, via information booklets in the staff room.

In the Prep School, medication is held by the School Office. Parents are responsible for ensuring that medication to be held by the School Office is clearly labelled with the pupil's name, expiry date and dosage.

Managing the condition

Epilepsy is different for each individual and the Prep School will work closely with parents to ensure that it is aware of information such as:

- The type of seizure the pupil is likely to have.
- What represents a medical emergency for that pupil, and what to do in such an emergency, including when and how to give emergency medicines.
- Details of additional educational needs, if any.
- Adjustments required to facilitate the pupil's access to regular activities.
- Any further information that will aid the pupil's best possible care.

In the Prep School, the pupil will have a health plan which will be kept on the child's file.

Accessibility

Epilepsy is considered a disability under the Disability Discrimination Act (DDA). The Prep School will see that reasonable adjustments are made to ensure that pupils affected have full access to the curriculum and the school community. Refer also to Disability Policy.

Exercise and physical activity

For most pupils with epilepsy, exercise can be a real benefit. A very small number of people with epilepsy however, find that exercise increases their likelihood of having a seizure. The Prep School will liaise with parents to ascertain what is appropriate and to ensure pupils can be fully included in school activities.

Creating awareness amongst peers

The Prep School aims to establish and maintain an environment where children are provided with forums to openly discuss situations that affect their fellow pupils thus promoting understanding and minimising speculation.

In the Prep School this is carried out during PSHECE lessons and in assemblies. . In 2013-14 the Prep School charity was Diabetes UK and the children were well informed that year. In 2015-2016 the Prep School charity was Young Epilepsy. In 2016-2017 the charity was the Orpheus Center and in 2017-2018 the charity was Alzheimer UK. In 2018-2019 the Prep School is supporting the Kent, Surrey and Sussex Air Ambulance.

Staff training and communication of the policy

The policy is available on our website. Details on what to do in an emergency are displayed in prominent places, such as the staff room.

Information is displayed in the staff room and on the intranet in Prep School Common/Health and Safety/Medical.

In case of an emergency

If a child experiences a seizure, the first aider will be called upon immediately. The first aider will follow any instructions given by the child's parents in event of a seizure. Otherwise the first aider or teacher responsible until the first aider arrives will:

- Protect the person from injury by removing any harmful objects nearby.
- Cushion the child's head.
- Once the seizure has finished, gently place the pupil in the recovery position to aid breathing.
- Keep calm and reassure the pupil, staying with them until recovery is complete.

Staff will contact emergency services:

- If it is believed to be the pupil's first seizure.
- If the seizure continues for more than five minutes.
- If one seizure follows another without the person regaining consciousness between seizures.
- If the pupil is injured during the seizure or it is believed they need medical attention.
- If there is any doubt at any time.

Parents will also be contacted.

Roles, responsibilities and review

The Headmaster, in conjunction with the Head of the Prep School is responsible for the implementation and monitoring of the policy. All staff are responsible for ensuring the policy and procedures are followed. Parents are responsible for keeping the Prep School informed of medical conditions that affect their child and for covering medication where applicable.

MEDICAL CONDITIONS: NUT USAGE

INTRODUCTION

This policy focuses on the management of nut allergies and should be read in conjunction with the School's First Aid Policy and Catering Department Nut Policy and Nut Usage Guidelines. This Nut Usage Policy forms part of our Medical Conditions Policy.

The School aims to practise a nut free policy although we recognise that this cannot be guaranteed. This policy serves to set out all measures to reduce the risk to those children and adults who may suffer an anaphylactic reaction if exposed to nuts to which they are sensitive. The School aims to protect children who have allergies to nuts yet also help them, as they grow up, to take responsibility as to what foods they can eat and to be aware of where they may be put at risk. Yearly our new intake are made aware that we do not allow nuts or nut products within our School for snacks, party cakes or seasonal treats.

STAFF

The onus falls on all staff to read and follow this policy both in School and when out on trips and outings and to be aware of which children are allergic to nuts. Staff and volunteers must ensure they do not bring in or consume nut products within school and ensure they follow good hand washing practice.

Caution must be taken at certain times of year such as Easter and Christmas. If Staff distribute confectionary care must be taken to ensure that no nuts are included in the product. Fruit sweets such as Haribo are a better alternative. Particular products and brands that are a cause for concern are: - Celebrations, Roses, Heroes and Quality Street.

All product packaging must be checked for warnings directed at nut allergy sufferers and if the following or similar are displayed, the product must not be used in School without supervision of staff and supervised hand washing:

- Not suitable for nut allergy sufferers
- This product contains nuts
- This product may contain traces of nuts

Each year there is an opportunity for staff to receive training in using adrenaline injectors (Epipens) and there are staff trained in the administration of these in every Key Stage, including the Foundation Stage.

Parents

Must notify staff of any known or suspected allergy to nuts and provide all needed information detailed on their child's individual Healthcare Plan, which is sent to them from the School Office. Parents must not bring in any food or treats (such as for birthdays) unless they have checked the ingredients carefully, likewise for snack choices. Homemade snack or party food contributions must have a label detailing all ingredients present and the kitchen environment where the food was prepared must be nut free. If you're unsure about a selection please speak to a staff member before bringing in the food item into School.

Packaging must be checked for:

- Not suitable for nut allergy sufferers
- This product contains nuts
- This product may contain traces of nuts.

This would indicate that this product is unsuitable for consumption at School.

Pupils

All children are regularly reminded about the good hygiene practice of washing hands before and after eating which helps to reduce the risk of secondary contamination. Likewise children are reminded, and carefully supervised, to minimise the act of food sharing with their friends, e.g. on Celebration Day where we have a family picnic onsite. Those children at risk of anaphylactic shock will wear a wrist band whilst at school which is provided by school and put on at the start of the day and removed at the end of the day. It may also be worn when going to sports fixtures or on sports trips.

Catering Department

The School's catering department, Holroyd Howe, emphasises the avoidance of nuts (tree nuts, peanuts and pine nuts) and nut related products, recognising the potentially severe allergic reaction, for some people. They have their own Nut Policy and Nut Usage Guidelines and all catering staff receive training in these. Within the catering facilities at the School, we take precautions to minimise the risk of anaphylaxis and other allergenic reactions occurring: We never knowingly use any nuts (including pine nuts and peanuts) or sesame seeds and associated nut/sesame products in our kitchens, however we are unable to guarantee that dishes/products served are totally free from nuts/nut derivatives.

The risk of claiming to be nut free may mean that children with allergies might be led into a false sense of security. There is a strong case to be argued that children with food allergies will develop a better awareness and understanding of how to manage their allergies if they grow up in an environment where allergens may be present but, as are restricted and monitored, as much as is reasonably possible.

Pupils who are known to have food allergies (e.g. nuts, egg, milk, gluten, fish, molluscs, crustaceans) are introduced to key members of the catering team, on their first day at the school, and are encouraged to seek guidance from catering staff on a daily basis, if necessary, on what they can have, from the lunch menu.

For children in the EYFS – a laminated card is placed on the table in the dining room where they sit which states what they cannot eat. This ensures that nobody gives a child the wrong food. In Year 1, a Year 1 TA stands at the counter and ensures that all children with allergies are given the correct food.

All children with food allergies are recorded in a document with their photo which is given to the catering team at the start of the year or when there are any changes/updates.

Allergic reactions can also be triggered by touching surfaces – such as computer or piano keyboards which may have been inadvertently contaminated. The success of minimising anaphylaxis risk and all other allergenic reactions requires the cooperation of pupils, staff and parents.

GENERAL

There are signs placed at all the entrances to the school stating NO NUTS!

The lettings policy and extra-curricular policies include information about not bringing nuts on to the site. External hirers send notification out to their delegates ahead of the event that nuts are not allowed and a member of staff meets new hirers on the first day to run through things and remind them in detail about the expectations and emphasise about the no nuts expectation.

The caretaker has also been fully briefed about expectations regarding visual checks and cleaning post hire and has a checklist that he will complete which we will keep as a record.
